POBURT.

Our Country, Boys! and all that. Come all whose hearts beat warm and true, For honest deal, and all that: Who hold 'tis right, when forced, to fight For country's sake, and all that-Come, don't be poor traitors now, And "nid and comfort" render To Mexico, your country's foe, And like some whigs, defend her.

Gird on your armor for the field-To laurels win, and all that; 'Tis craven souls alone that yield, Till soudly licked, and all that! Hear whigs refuse to vote supplies To clothe and feed their brothers. Disgracing with their craven cries The prowess of their mothers.

Stand by your country, firm and fast, Her honest fame, and all that There is a righteous power a blast The traitor's hope, and all that: A traitor's hope !-- what hope is that? Base be the knaves that bear it-

And know ye, 'tis no Democrat That has a soul to share it!

No, let the whige that honor hold-They've earned it well, and all that; Except a few—they're only bold In treason's cause, and all that: They never loved their country's fame, Her equal rights and freedom: And Tory traitors own with shame That modern Whigs exceed 'em-

COQUETTE. A body formed without a soul, A heart without its beat, Where pride and falsehood hold control,

Hypocrisy its seat. Where love and virtue cannot live, Nor honor find its way, A kind of thing formed to deceive. Not made of honest clay.

Something that many seem inclined To think their home would bless, But surely they will over find The naught but emptinees.

OBIGINAL.

If this should be the means of saving even one of my fellow beings from that most troublesome age on the request. Address.

L. A. GODEY,

the benefit of yourself or those similarly afflicted. I have been for the last four years most severely afflicted with a number of covering my face and part of my body most of the time. I have been unable to attend to my business, during that time I have taken every medicine that has been recommended, and have drank gallons of the Sarsaparilla Syrup and decoction, all of which has not had the least effect upon my disease.

At last I was recommended by my physician to give your Sarsaparilla and Tomato Bitters one trial, as he had used them with good success in a number of similar cases. I have used only four bottles, and to my utter astonishment it has entirely cured me. I think the cuts which accompany this will show you the wonderful difference in my appearance. I do most sincerely recommend your medicines to all, and know they will find them a most valuable article.

Yours, truly,

For sale by J. K. Hammon, Paris, and Ansel Field, South Paris; also by Druggists and Agents generally.

Oxform, ss. Court of County Commissioners Paris, December adjourned Term, 1847. READ THE CERTIFICATE.

Boston, May 25th, 1847.

Mr. Seth W. Fowle,

Dear Sir:—There are so many quack medicines at the present time, and each one has more or less certificate from real or imaginary individuals, that I have for some time had doubts of the propriety of giving any testimony in favor of your medicine. But being assured that I have for some time had doubts of its medicinal qualities, I may, perhaps, be the means of saving some one similarly afflicted. I therefore cheerfully add my testimony in favor of the medicine that I know has done me great good. I have been afflicted with the Bronchitis for a number of years, and by the use of a couple of bottles of

Wistar's Balsam of Wild Cherry,

I am happy to say that I am almost free from the above troiblesome disease.

AND FAMILY RAGAZINE,

Oxront, ss. Court of County Commissioners at Paris, December adjourned Term, 1847.

Works, at STEEP FALLS, is completed and in operation, ready to execute orders for any kind of custom or job work.

The proprietors are determined to make this establishment worthy the support of the public. They have spared no expense in the construction and arrangement of their works; and having secured the sorvices of experienced and skillful workmen, and supplied them with the best of materials, will warrant their work and wares to be equal to anything of the kind made elsewhere.

They are now manufacturing STOYES, Caldron Kettles, Oven, Ash and Boiler Mouths; Cart and Wagon Boxes, Door Scrapers, Grind Stone Cranks, with friction rollers, &c., &c. Hut as the cold season is approaching, they will, for the present, devote their works principally to the manufacture of

STOVES, and would call the attention of purchasers particularly to the extensive and excellent variety of patterns they have already on hand. Among them to Five sizes of 4 Boiler Fremium Cooking Stoves, No.'s 1, 2, 3, 4 and 5, with holes from 7 to 10 inches diameter.

diameter.
Four sizes of 3 Boiler (or Eathbone) Do., No.'s 2, 3, 4 and 5, with holes from 8 to 13 inches diameter.
Two sizes of Parlor Cooks or Elevated Oven Do.
Two sizes of Air Tight Parlor Stoves, Cast tops and Three sizes of Six Plates.

These sizes of Six Plates.

These are modern patterns—got up in good style, and sufficiently heavy to be durable.

In addition to the above, they have purchased a set of patters, and the exclusive right of unaudateing lug and selling in this region, of that newly invented and Patented Hot Air Stove, called the Mechanicvale Air Tight,

which for beauty and simplicity of appearance, convenience in the arrangements, and economy of fuel—both for summer and winter, it must be conceded is the best Stove out!

is the best Stove out?

They have also, nearly in a state of readiness for use, patterns for an Elegant Cast Iron Parlor Stove, which must colinge anything else in the market.

These Stoves are being made from No. 1 Scotch Pig Iron, and will not be liable to crack or give out. But as certain plates of all Stoves fail before the rest, the fact that new plates can at any time be procured, and what would otherwise be a useless Stove, at a small expense made as good as new—is a consideration that must give the home manufactured article (other things being cound) a decided preference over

(other things being equal) a decided preference over those manufactured at a distance.

All kinds of Sheet Iron, Tin and Copper Ware fur mished as above at the shortest notice; and the whole at prices that shall be satisfactory to purchasers. BROWN & CO.
Steep Falls, Sept. 16, 1847. 20

SWITH'S PATENT Trojan Pioneer Stove.

MANUFACTURED BY LEWIS P. MEAD & CO.,

1 of 2 doors North of the Post Office, Augusta. A LTHOUGH completely adapted for hurning Wood, yet with Cool, for all Cooking and Reating purposes, it far surpasses any other Cooking Apparatus that can be produced. It is surprising to

Apparatus that can be produced. It is surprising to see the large amount of cooking, of the various kinds, that is done (in the most perject manner,) with the small unwant of fuel that it requires.

The oven to this Stove is extremely large, being of sufficient capacity to admit six large sized fie plates, or six large loaves of bread, or even the largest pudding or beam pois in use, at the same time. In addition to the advantages it has over other Cook Stoves, for boiling, baking, washing, frying, heating irons, &c., it is acknowledged by all who have used it, to have the

Best Arrangement for Broiling & Roasting that has ever been in use; the steam, from cooking, being carried off effectually.

The parts of this Stove can in one moment's time, be so disconnected as to make Two Perfect Stores!—which is of great value in the warm season of the year. In cold weather, these may be connected.

When it is necessary for a fire in the front part of the Stove, it will operate the whole, and perform more kinds of cooking, with less fuel, than can be done in any other manner. Another improvement is a Sliding Damper on the top of the Stove, by which the heat is so completely graduated that the fire can be kept over night, so as to make of it a complete

Air-Tight Stove. This Stove certainly has many advantages that no other Stove ever yet had. The Ovens are about the only ones in use which will bake well with hardeout,—as most of the Stoves used are so constructed that the Ovens will not bake even with a coal fire. There is another great advantage in the construction of this Stove, in first applying the heat to the bottom of the even, which causes the bread torise, and at the same time, thoroughly crusts the bettom; whereas, in stoves which first carry the fire to the top of the even before if reaches the bottom, the bread will crust on the top before it is sufficiently done through, which prevents the loaf from rising, and causes it to be heavy—the top being crusted hard, and the bottom of the sufficiently baked.

All those in want of a first rate Cooking Stove, are

not sufficiently baked.

All those in want of a first rate Cooking Stove, are particularly invited to call and examine this Stove before purchasing elsewhere, and time and money will surely be sayed, as they will decide soan to purchase; the price will be found to be very reasonable. There are a number of sizes, suitable for the smallest family up to those for a public house. They are not and complicated in their construction, but easily the small beach fover our coals, Gold in Silver Mixed.
